

Caddies Made Easy

Customization and Flexibility

We're changing the way you think about caddie programs.

CaddieNow offers three distinct service platforms each fully customizable to meet the unique needs of your club.

CONCIERGE - Your Caddie Program, Our Technology. Keep your existing caddies and staff, our caddie management software makes operations, communications, paying, scheduling, booking and rating caddies much easier!

TRUE-IC - More Caddies, Technology and Insurance. Expand your caddie pool and quality, provide more booking options and more protection for the club. We help recruit, certify and grow the quality of your caddie pool. Members can book a caddie using our mobile app or through your club's existing caddie booking process.

PREMIERE - Fully Customized Employee-Based Solution. Take all the headaches of managing your caddie program off your plate. We will deliver the highest quality caddie experience at your club while protecting against class action lawsuits, FLSA, wage & hour and injury-based liability.

CaddieNow will work with you to determine the service platform that best meets your needs. Once the ideal platform has been determined, our team works with you to customize the program elements to offer the desired caddie experience for your members.
